where you grew up outside of Rio de Janeiro So people don't think when when they see me or they see like my songs and whatever they don't imagine that I come from the communities It could be called the ghetto a little bit It's like the favelas When you go to Brazil there's communities places that the houses are really close to each other It's a really humble place Simple I come from a place like that I was born and raised in a place like that My mom used to do the best she could to fake the danger and the bad side of it for me and my brother So we all see everything with this beauty and playing in the streets things like that very like very like in the you know but she always told us that a way for us to leave there It's not that we don't like there but we all want to leave because we want a better life So she always said that the only way to get out would be study and we always did the best we could like studying and doing like all we could And um I always loved music So I started doing music but also like studying everything I was my own manager for like 10 years Me and my brother we were partners So it was a whole job not only from arts but also like business When and at what age did you realize your love for performing Oh no since I was a little kid I was already like when I was three years old like four or five I was already singing And my family used to ask me like these questions like what are you going to be when you grow up Whatever And I always used to be like I'm going to be famous I'm going to be an artist I'm going to have a pool in my house blah blah blah That was literally me So you kind of always knew always I would pass through pass by some places that I knew it was like TV places like studios or whatever And I used to open the window or go to the bus with them and say like you guys are going to see me I'm going to work here blah blah blah nine years old I was always like this personality kind of crazy I love that so much though because I think sometimes you have to have that energy in order to get to where you went Like sure I was sure it was not that I said oh I want to be I was sure I would tell my family where I was going to live how my house would be the TV Shows that were going to be the people we were going to meet I would be like that when I I was a kid I could literally see and dream about this and like my family was like OK because it was a very humble life So they would never prospect that in my life So they would be like OK and I was like you guys don't understand I'm not saying I want to I'm going to be there There's no option It's happening Do you guys want to come along for the ride or not Exactly who were some artists that you admired growing up Mariah Carey was my first one She was my first divi and I had the opportunity to tell her that and it was crazy and then be on

the phone with her for hours That was also crazy for me She was the number one forever And um then Rihanna and now I'm sponsored by fan I did the Fancy Show I do like photo shoots for fan It's crazy Even when you're saying that like does it still feel surreal Like how much success you've had I think we should always remember it because um sometimes and I think the industry does this to us They push us to think that we need always more more and more and more And I think nowadays with the internet it's kind of impossible for you to reach everything everyone every time you got to be happy also you got to take time for yourself also So I think that uh this speech that I used to have for my life for many years like you can be more you can do more Never stop never give up I was like that And when I was like that I couldn't see those things that happened in my life I would be like oh ok Yeah I met Mariah Oh ok Yeah I loved it but I couldn't like look and be like wow Nowadays for me it's like yeah we can definitely give up we can definitely go rest take a nap go to sleep We don't need all the money in the world You know a person the money doesn't mean happiness and the many as many number ones you get in your life that's not going to make you happier or not So for me it's like every single thing that happened that happened in my life I learned how to stop and be like wow look at what I did This is so and then live that moment again I got to this reflection because last year I got super sick right Super sick I couldn't do anything I couldn't go upstairs in my house I couldn't do anything Literally for three months I was like and um I thought literally that I was going to die It was a whole thing And then um I was in the hospital for so long and then I was like you know what I was just working working working to reach everything and thinking I still didn't have enough and now I'm here And what did I get from life Right Did I enjoy it Did I have fun Did I do nothing And the thing that I wanted the most was to travel to have more free time But today is too much for you to be successful You got to be on Instagram youtube tiktok Spotify It's so many things that you got to do We are just one human being It's too how can we do all of that It's a lot So I'm not up to waste my life searching for things anymore because I'm almost 30 now I'm 29 and I do think it was important and amazing for me to do that for so many years But now I just want to rest if I get more success Amazing If no it's OK Your birth name is actually Larissa Do you mind sharing Why And when you started going by Anita So um my name Larisa is very common in Brazil Anita is a name that there was just one character from a series called Anita And I wanted to be this girl because she used to say that she was like an 18 year old character in this

series She used to say that she didn't like to be just one girl She liked to wake up and decide which girl she wanted to be today I want to be crazy tomorrow I want to be sexy and then I want to be pretty and then I want to be princess And I was like that's so cool because I don't want I don't like to define myself and be like OK I'm this I'm so many things I like to discover every day A new me you know and I think people have the necessity of defining you and be like oh she is that and I like to be all What is the difference between Ressa and Anita Oh my God it's huge It's huge I started my career 12 years ago here in America I am a best new artist I'm joking but I am nominated as best new artist for the Grammys because it's a new career started from the zero You know I left everything and I came to start here again But 12 years ago when I started there I created this character because Me Larisa I'm very shy to be honest I'm very insecure I'm very like I don't like going out I don't like socializing I don't like doing anything you know I'm so the opposite of who I am when I'm in this character and when I created this character Anita I wanted a person a person that would be completely against hypocrisy you know people that are hypocrites that say one thing and do the other you know and that's what I wanted to do How many languages can you sing in sing I can sing in five languages It's because I sing in Portuguese Spanish English Italian and French But French just a little bit I speak just a little bit an Italian a little bit How the fuck did you learn all these languages So I'm going to give a very good example right now of Larissa and Anita right So when I go to in as Anita you got to deliver entertainment right So people ask me how did you learn so many languages They say with boyfriends whenever I wanted to have a know a new language I would date a different guy and like different accents But in reality I had which is kind of boring The reality Larisa I hired different teachers from different places of the world and I used to leave them in my dress room for whatever commitments I had So I used to get two hours of Glim every day I would be studying during this two hours the teacher would be telling me and I would be studying for these two hours I fucking love your honesty of like let it be so clear Anita is like bitch if I wanted to learn Italian I'm going to date an Italian man Fuck an Italian guy Like actually I was just hiring people and they were just teaching me Do you ever worry that Like now being so honest about the two characters that people will be like wait why what the fuck Like this isn't the real you No because I I think it's so important for me to have this clear and to understand that I use my character to break rules to to break boundaries and like things that limit us women to do all women women that wants to be free

in sex women women that wants to be free in work whatever I like this character it brings it brings to us um self esteem confidence and something to look at even I do when I'm myself Larisa Nowadays I look at me as a character and I'd be like OK I think I can get that from Anita and be a little bit more confident about myself You know it's so much easier for people to watch a movie and see that character and be like ok and understand the actor is another thing but they don't understand that musicians singers they do the same thing We do the same thing There's no way We're bringing the on self the person that we are at home the person that we are in family and bring this person on stage It's not entertainment It's not it's not different enough for people to look and be like oh this is special Who is your favorite person that you've collaborated with on a song Uh Snoop Dogg That is for sure because I think him and Cardi B because they are so funny and Snoop Dogg is very like simple humble and he's like everything for him is a vibe It's all about if he likes you If he likes what your energy if he has something kind of I don't know he sees someone and he feels the energy and then he decides if he likes it or not I feel I think so That's what I think from him because I just feel like I can hug him and be there like safe forever I think he's one of the coolest guys and Cardi B she just funny that good energy like best energy like high level I love that I was reading the list I'm like Pharrell Missy Elliott Snoop Dogg Rita or a Cardi B so Sweetie Becky G I'm like back is one of my best friends Was great energy too It was so good so good OK Anita you're also known for your dancing OK The Anita challenge went viral on Tik Tok which I remember just watching these videos and being like what how is this not getting censored on tiktok I can't even like fucking curse in my tiktok Meanwhile people are like doing the challenge and like it it's incredible watching it Can you explain how twerking in Brazil is different than twerking in America Because it's not even only twerking It's partying in general I think here in America people in the parties they are more concerned about who they're with where they're going what they're wearing And you know it's like the table situation in Brazil there's no table situation you go to the party there's no table Everyone is just one place mess together to find out you know and um we love dancing we love dancing Sometimes we don't even understand whether you're singing We just want to dance sometimes it's just the same lyrics over and over They just sing a different melody just same words always and we love it We just want to dance We just want to listen and dance What is it like being known for like the way that you dance So are you so proud of yourself It's crazy because in Brazil it started this fever of like oh

we're going to do Anita moves Anita moves OK Now we need you to Twerk OK OK So this is gonna be iconic I think people will fucking love it Is this the wrong surface Oh My God OK OK So you want music No it doesn't need to OK So you just feel like you're gonna do a push it right OK And then you just do a circle that basically you're doing this with your knees OK You focus here in your head What So we like good question What how that must take a lot of you doing this but in this position Anita Oh my God I could only dream No But this other one is hard though when you do like when you do a circle but you stop in the middle So you do a square This one is harder like when you do this oh oh I feel so creepy I literally holy shit dude That was so good I am inspired now to go home and like secretly practice it but like not let anyone know I'm practicing it but I will be working on it And next time I see you maybe I'll have a little move to bust out and do you incorporate these into your sex No no It's just a dance When the guy asks me to dance I go like dance first is never going to fucking dance So I'm like what the fucking question is that right You're like I'm not performing Exactly It's like dance first You dance I dance Are you currently single or in a relationship I'm single completely single and not looking for anything I'm so happy with myself and I don't have sex in months So many months I don't even remember the last time I had sex To be honest with you Are you just masturbating No I listen I didn't find anyone special enough that I would think like ok this one deserves to come here and you find it yet You're spending time alone But I was crazy before I used to like fuck even like one person that would cross me on the street I would be like you come here stop I would be like that How did you get that confidence Just to go up to people Because I was living Anita 24 7 at the time Do you have a type of guy girl breathing in alive I don't know There's something inside that comes and there's something for some reason I can feel it and then I'm like hm So there's no type I can literally show you three different ex-boyfriends and you'll be like what's the sense between these people I love that though What do you think is like something that you're most attracted to in a person I think when they are funny I love when they're funny you make me laugh I'm like and it's so good when they are confident a little aggressive but in a good way I like when they are aggressive in a good way Not like abusive relations Have you found yourself in any abusive relations Yeah Terrible But I need it just once and then never again like in two months after this one guy I had for a year and something uh I can look if I'm starting with someone in one month I can feel it's abusive and I'm like out can you try to give like if people

are listening they're like fuck Like I think I may be in one like do you have any like signs or things to look for Yeah because in the beginning they let you feel very comfortable you know and then they start to make you feel insecure about yourself without saying they don't say you are less or not you know they just make they point it's like they point things in other people that they are actually talking about you but they pretend they're not And then oh honey I'm almost a psychologist I look and I'm like OK and then I start bringing shit over for themselves to think So you mean like they'll point something out and someone in a room that relates to you or what you don't have or just say like you see that so bad Oh my God Kind of like to guide you how to not be are you usually the one breaking up with people or they I am I need that to change though I think that's why I'm waiting so much I want things to be different Got it What is a deal breaker for you in a relationship when I feel suffocated I don't like that or when uh I think when I feel suffocate is the number one thing like when the guy doesn't let you breathe and like jealousy for no reason you know like too much Come on or needy Like I'm easy I want to talk to you like 24 7 Come on Give me a break Give me a time to breathe Right There's nothing more unattractive which I get it We're all insecure but being in a relationship with someone that's so insecure about you in the relationship It's like such a turn off You're like can you just like get into therapy Muster the curry Like when the guy tries he's selfish He tries to say he's doing things for you but he's actually doing for him He doesn't want to be alone He is needy He doesn't want to stand with himself alone But he says that oh no I'm doing this for you Come on you're not I want to be fucking alone Yeah For for a little time Can you give advice to women listening that are like OK wait Anita you have not been with someone You're not hooking up with people like how are you so comfortable being alone So everything started and I hope people don't need that to change lives when I got sick That was like when I was in bad thinking I was going to die I started to look over all the things in my life and I started to see all the things that I didn't want to repeat again It's not that I don't want to have sex with people anymore Please God I'm down I'm open I'm free tonight I'm just saying that I'm rethinking the reason why I used to do things and how I was doing things and I want to do differently I don't want to have sex with a guy because I want him to fall in love for me or because I don't want to lose him I want to have sex because I feel like doing it because I feel like this guy deserves my this queen going to you know I don't know And before I didn't used to like staying by myself I used to just like need friends every time in

my house friends every time I needed people And now I don't need no but I can be alone like this for days you know cook my own food and be like life is beautiful I'm just here chilling and I feel like we need to ask ourselves why are we scared of the silence What is inside of us that we don't want to listen to You know what what we don't like about ourselves that we don't want to face it I'm not saying I regret the thousands of people I fucked I'm just saying right now I don't feel like maybe next month I feel like fucking thousands of people again just now I just feel like um uh not right now Is it worth it I remember I went through almost this is I've never said this I almost went an entire year in my twenties where I did not have sex and I was like totally happy I'm so happy Like it was just like a reclaiming moment for myself of like I need to just figure my own shit out and I don't need any penis getting in the vicinity of me while I try to I kind of want but it needs to be a great penis It needs to be a penis plus a brain plus a tongue Plus so many things you know it needs to be uh like a mix because it's a lot of work to have sex for me It's a lot of work I like to put a show on Oh you do Can you give us some tips Anita Like if the girls are like what do you mean put a show on Like give us some tips Like what I like to enjoy myself I like to feel like I'm like dancing and performing Uh Is it a deal breaker for you If a guy is not good at like eating you out I teach I love you I would teach I would say come on let me say something do this do that And I don't like when they go like this they put the tongue very um hard and they go like and it and it's like you're going ah Right Oh my God I don't like that Right It's just like a little like slithering and you're like it's so bad these days Oh by the way I didn't have sex with guys this whole time with girls I did have so I was teaching this friend of mine how to how to eat a pussy these days And she was like oh it's that easy And I was like yeah I came in three minutes She came in two You were practicing on each other and we're just friends There was no sexual connection No I was just teaching her She just took off your pants like here's my vagina Let me teach you fuck OK We need some tips without taking off your pants and you have to do you have any like like one specific thing that you can adjust for the men or women listening that could maybe just like help achieve more I will say first of all for girls for whatever guys girls to eat girls personally I think it's kind of different for each girl I don't know the things I like can be different from the things other girls like me personally when I'm doing that with the girl I go nice and slow I do circles and then I just do up and down and I do side by side but like slow and wet and not like you're eating a pasta is just like you are in an ice cream that is cold and you

cannot freeze your tongue If you're gonna you're gonna freeze your tongue you're gonna feel like ice cold And um yeah I just go nice and slow and then I put a finger on it and I don't put the finger on it like you know I just put it like nice and slow small movement movements and like just smooth you know and and uh and then um uh like I don't go in the crazy side by side I like I just go in a smooth keep going with the flow you know and the girl is kind of gonna guide you and then you can just put the finger in the beginning of the entry of the vagina You don't need to go all the way down there And it's not because the woman squirt that she came There was this time this guy made me squirt like 20 times and uh I was not coming I was like this doesn't mean something is happening Men that are obsessed with getting a woman to squirt Let me look at me in the eyes of this camera Stop the next day It hurts it hurts so bad Come on I think sometimes men forget like would you want us like jack hammering your dick No you like when it's like very wet and like you don't need it to be like let's fucking go imagine we did that also dry You would have rug burn Same for us ok Same for us There is also like with guys what I do um Let me try to give an example I always use oil when I can when the guy is not full of like some guys are like oh you're using I love I love using lubricant love it And some guys think it's because they're not doing a good job Shut the fuck up It's just more pleasing Yes you use lubricant I put the lubricant I'm going to teach you in this bottle OK Here we go I put the Lubra can and then I go like this First of all I go like this and then this is one movement and then you're going to do something there's something you can do that They are not going to understand what you're doing You could tell him to close his eyes You're going to do this You're going to hold here in the bottom and you're going to do this with the hands like this You go down and circle down circle down circle and then you go up and down up and you do this but up and down up and down and you do this He's going to be like what is happening but you should put um law breaking on it but you go like this don't do this It's like go up and down Don't don't let it go just up and down and you do this open and close open and close because then you're going to switch the pressure on it and they're going to be like what is she doing though But you got to put lubricant on it right So you're kind of like massaging down past their tip and then around their shaft while you're holding the base like this Oh That's magical And then they get super confused because it feels like a blow job but it's not And then for the blow job I like using um things that you put in your teeth to to fix it Plastic Yeah Yeah Yeah The invite kind of there's a bunch of brands if you use the

one down just the one down Life changing really It feels like you don't have teeth I need it feels like you don't have teeth You can try I just added that to my Amazon cart You can ask them why you're going to feel like you don't have teeth and just on the bottom because it's going to touch the Yeah because it's on the up too It's going to look weird But if you use only on the bottom they're going to feel like you don't have teeth because you can touch as much as you want with this teeth here because it's not like aggressive It's like smooth as the plastic This is an educational podcast We are But this is bad They don't like it Like the brand of the dentists they will try to kill me They're going to say I'm bullshit because I try to say that But in Brazil wow they they wanted to kill me I feel like they would love it You are going to kill me No no no That's not the purpose This is health for people to take care of while you're sucking dick You're also aligning your teeth But people don't want to know about that They don't do blow jobs They just were born from Sand Spirit that came and everyone is virgin today I am I am that this is a great technique and you can be fixing your teeth while sucking dick Nothing better I wouldn't say that I'm not a dentist I'm just saying if you want to try you try If no it's OK If you already have one pop it in See how dentists hate me because I said that in Brazil they hate dentists They do because I said you it's good when you use it but they hate it They they don't like that I said they're the virgin dentist Uh They need to fucking relax Have you ever been cheated on once when I was um 1918 So how did you find out Oh my God Online A fan A fan told me no And oh but twice I was twice Once was a fan told me second one I pretended it was a fan because I actually dreamed about it I dream about about a lot of things that actually happened So there was this one time I went to sleep This boy I lended my car to him He didn't have a car I lend my car to him I was already a singer I was performing somewhere else He went to the place and he when I went to sleep I literally went to like in my dream I went to the club He was I saw him kissing the girl He was wearing blah blah blah blah blah The girl was wearing and it was so clear to me and I know I have these type type of dreams So I didn't tell him I dreamed I said hi a fan took a picture and sent me you were with this girl you were wearing blah blah blah She was wearing blah blah blah And then he was desperate saying yeah I'm sorry blah blah blah After months I told him I dreamed it Have you ever got caught cheating Um No I'm so smart I am so smart How do you feel about sex on the first date I don't care if I feel like I do You just be yourself and if he likes you amazing If he doesn't it's because he's an asshole and not that he's an asshole He doesn't match you

and you just want him because of you think you need to go for something but you don't I love the advice It's like if you're good with yourself who gives a fuck if they if you don't care it doesn't matter There was this one time this one guy I went on a date after it it ended up not happening anymore I was like he doesn't want me blah blah blah And then after two weeks when I was like better with my therapy on point and I was like what the fuck I was doing with that guy He has he makes snow So he kisses terribly His kiss I was like where the fuck did this guy learn to kiss It was like it was a terrible kiss The sex would be even worse Why I was caring so much It was it's just our fear of being rejected It has nothing to do with the guy We don't even care about the fucking guy So it has nothing to do with the fucking person The person sometimes is shitty and we are concerned just because we don't want to feel rejected I also think a good bit of advice is pretend in your head Imagine if they were obsessed with you and they wouldn't stop hitting you up then now assess would you actually like them Like if you're coming from a place of like they don't like me I want them to like that's just the chase and we get to know and then he texted me and I was like no thank you like you kiss like a frog I was like no today I have my mind So on point No thanks Some people you just go with them because your mind is not on point right And then you wake up one day and it's like what the fuck what I was doing with that person It's so crazy too When you look back and you're like I can't believe I was fucking obsessed with that guy He fucking sucked Yeah Sometimes you just need to like step away from it How do you feel about sharing nudes I don't do that You don't No Is it just because you're nervous because like you're a celebrity before Yes Nowadays I just think it's uh I know I think it's more sexy when you're wearing like panties or something that is almost showing but it doesn't show I think it's more sexy It plays more with the imagination to be honest I love that or like having a hand on it You know it's more even a picture of a dick It's not beautiful Come on getting a picture of a dick Let's be honest Let's be honest It's not great You're like out there and when you see that guy naked like it's not hot that's not hot What are you responding If a guy sends you a dick pic I'd be like I said an emoji or something I don't know I'm like uh that's not it I don't know I don't feel anything with that What emoji Um but the ice you know these two eyes that look like that's it It kind of doesn't say anything It's just not to leave the guy I kind of love it though because then it could make him a little insecure of like we hello And you're like that's all you get That's all you get Do you like sexting sex What Sexting Like texting sexting No no All these things for me

are just not I like the real thing Come on Come here Let's yes Not the sex Sex I like the little horny talk Uh-huh but not the sex Like I'm going to put my dick put in your pussy and bang it 20 times I don't like that I like the little horny thing You know what intimidates you in the bedroom What intimidates me A huge insanely huge dick trying to put it on my ass That's very intimidating when the dick is like huge It's so trying to go in your butt hole It's kind of not good because you're so scared This one guy I saw I was like OK I think I'm going to try here and then this dick was so big so big and I was like listen I'm scared and then he said why And then he said this is something I don't think I can handle at right now at this moment of my life I cannot handle this I think Check back with me in a couple of months and then we just talked and cuddled and it was it Have you ever had a threesome Oh so many times Do you enjoy them I do I think it's cool I like it I think it's more but you you have to be very aligned with everyone you know And yeah I have threesome 46 some I had a boyfriend that used to like to like switch couples and all Do you like the thing Did you like it Yeah He was very comfortable and the people he always let me pick and um it was just fun It was very cool and respectful and fun Did you ever get jealous Oh no I'm not a jealous person I'm jealous if I don't feel respected if I don't feel respected I'm very I get not even jealous I get angry I think that people that want to potentially do threesomes or four sus or org or whatever Like I think you need to know yourself before you do that Like if you're a jealous person don't fucking do that Yeah Know yourself Sometimes people I think do it for their partner and it's like if you know your relationship don't do it just because you think he or she wants to do it Yeah That's a big issue To be honest I don't Yeah I think you need to be be very friends with your partner to make sure he also there was this one time and three sons also with guys but he wouldn't be with a guy just me and he was super comfortable with that He picked it and it was cool I liked it to be honest but he let me feel free with that Do you like to use toys in the bedroom I do The guy got to be confident though I know but I do Me too And that's why I I did my line of a perfume Like when I did that it was more about like I was doing concerts and obviously I'm performing for like two hours and carnival is like four hours performing nonstop even seven hours I've done And um when you finish you don't smell good to let's just have a real talk A butt hole smells like butt hole If you go in the end of the day you put your finger in a butt hole and you smell it It smells like butt hole It's a place that is there inside locked in the dark warm hot doing this the whole date This is going to sweat

It's like under your arms There's no way you're going to sweat you're going to smell it's there inside of your whole clothes So I was like I don't like I'm obsessed with the smell right And I was like I don't like smelling like sweat in my butt home And then a friend of mine told me oh I'm gonna do something for you And she did this perfume and I used it and it was like I was smelling gray even if I went to the Sahara Desert and I did a music video there It was like 42 °C and it was so hot I was wearing like a jumpsuit of plastic I was sweating like crazy and I was still smelling good I was like you know what I'm going to make this like professional and then I did it and you just smell amazing Your pussy and your butt hole smell great the whole time And then I give it to the guys that I'm with and they put in their balls and the dick and the butts too They smell great for me It's such a like a turn on I love it after I got this product Something I always done was like to forget oh my God by accident my panties at the place So they smell it smells insanely good like strawberry or whatever cotton candy And this guy obviously when you leave guys pay attention he will smell the panties he will smell the panties He wants to know and then he will smell the part that your butt hole is on it and it's not going to smell like butt home and it's just heaven they always come back Anita you're giving us everything we need today OK There's so few people that you can just like have an open conversation like this talk about your sexuality your sex life What do you want people to know about you as an artist and an individual if they're watching today and they're like new fans Like what would you want to say I would say definitely what I said here Like I think I'm an artist that fights against hypocrisy You know that's the artist I like to be about everything not only sex but I bring up subjects which is like talk about my plastic surgeries talk about sex talk about poop talk about things that we all do and uh for some reason we we live our lives pretending we don't you know and um I don't understand what's the type of insecure or I don't know that make people live in this fake world that just pretend life is this 24 7 glam Knowing more about you now and knowing how hands on you are with your craft like you are running the show you're your own manager you do everything I I really respect you and I cannot wait to see what what you do next and I can't wait for the new album and all the things you deserve all of it So thank you so much for coming on Thank you I loved it I felt really at home I hope people like it and I loved meeting you You have great You do too Love you
